

Hi Steph,

I spoke to Bob today about updating the completion dates for the remaining issues on site. I have included the updated dates below. When discussing the transformer area he mentioned that the email we had sent him regarding access to the transformer area was so far successful in getting them access to the area. Regarding the dry well, a question came up about current contamination. Bob mentioned that the well had been cleaned around 8 years ago, however since that time there has been a release of TPH. He mentioned that none of the TPH is in the ground water, however the TPH releases are expected to be an ongoing with the well. He therefore asked whether the memo should address the current contamination and possibly a plan to pump out the contamination every so many years. I asked Bob to continue working on the memo while I check if some language regarding to contamination control should also be addressed.

Due delay with the renewal of contract, below is are the new target dates Bob and I discussed:

Transformer

- ✓ Response with CL&P contact information by 6/1/2010
- Former CEE/Inteli Data update on the progress made towards working with CL&P is due by ~~7~~7/1/2010
- EPA intends to request access permission from CL&P on your behalf by ~~7~~7/1/2010

Drywell

- Memo documenting drywell history of being cleaned & recent update sent to EPA by 6/25/2010

QAPP

- QAPP comments sent to EPA by 6/14/2010

Thank you,
Marilyn
